¹The private coverage category includes plans obtained through an employer, purchased directly, or purchased through the Health Insurance Marketplace or a state-based exchange. The category excludes plans that paid for only one type of specialized service, such as accidents or dental care. Private health insurance includes managed care, such as health maintenance organizations (HMOs).

²The Medicaid coverage category includes children who had Medicaid or other state-sponsored health plans, including the Children’s Health Insurance Program (CHIP).

³Children not covered by private insurance, Medicaid, CHIP, state-sponsored or other government-sponsored health plans (starting in 1997), Medicare, or military plans are considered to have no health insurance coverage. Children with only Indian Health Service coverage are considered to have no health insurance coverage.

⁴Preliminary data based on the National Health Interview Survey’s Early Release program. Estimates based on the preliminary file may differ from estimates based on the final annual file and have larger standard errors associated with them than standard errors based on a final annual file. Available from: Cohen RA, Terlizzi EP, Martinez ME. Health insurance coverage: Early release of estimates from the National Health Interview Survey, 2018. National Center for Health Statistics. May 2019. Available from: <https://www.cdc.gov/nchs/data/nhis/earlyrelease/insur201902.pdf> and National Health Interview Survey, 2018 preliminary file. NOTES: SE is standard error. Data are for the civilian noninstitutionalized population. Health insurance coverage is at the time of interview. Health insurance categories are mutually exclusive. A small percentage of persons are covered by Medicare or other public plans, military plans, or other plans. Estimates for this group are not presented.
