

## Acknowledgments

The authors gratefully acknowledge the following individuals for their contributions to this project: from the Agency for Healthcare Research and Quality our task order officers, Lionel Bañez, M.D. and Elise Berliner, Ph.D., from Centers for Medicare and Medicaid Services Susan M. Miller, M.D and James Rollins, M.D.

## Key Informants

In designing the study questions, the EPC consulted several Key Informants who represent the end-users of research. The EPC sought the Key Informant input on the priority areas for research and synthesis. Key Informants are not involved in the analysis of the evidence or the writing of the report. Therefore, in the end, study questions, design, methodological approaches, and/or conclusions do not necessarily represent the views of individual Key Informants.

Key Informants must disclose any financial conflicts of interest greater than \$5,000 and any other relevant business or professional conflicts of interest. Because of their role as end-users, individuals with potential conflicts may be retained. The TOO and the EPC work to balance, manage, or mitigate any conflicts of interest.

The list of Key Informants who provided input to this report follows:

### Key Informants

Mark Calmes  
ALS Association  
Decatur, IL

Sairam Parthasarathy, MD\*  
University of Arizona  
Tucson, AZ

Gerard Criner, MD  
Temple University  
Philadelphia, PA

Lora Reineck, MD  
National Heart, Lung, and Blood Institute  
Bethesda, MD

Marny Eulberg, MD  
Easter Seals Colorado  
Westminster, CO

Steven Ziegler  
ALS Association  
St. Louis, MO

Louis Libby, MD\*  
The Oregon Clinic  
Portland, OR

\* This Key Informant also provided input on the draft report.
