

**FIGURE 9-4** False-color-coded 3D representation of PtK2 cells exposed to NIR femtosecond laser pulses at a mean power of 2 mW. Two-photon images: (a) transmission; (b) PI fluorescence; (c) TUNEL-negative nuclei, without fluorescein fluorescence; (d) electronically merged PI and fluorescein fluorescence; (e) overlay of transmission and fluorescence images. The scale bar represents 15  $\mu\text{m}$ .
