

## FTP SITE INTRODUCTION

Welcome to the Supplementary Information ftp site for *Searching for Molecular Solutions*, by Ian S. Dunn, published by John Wiley & Sons 2010.

Information here can be grouped into three overall categories:

- 1) Color versions of certain specific figures already in the book, for provision of additional detail. These are contained in the file 'SMS-ColorFigures'.
- 2) Information corresponding to specific reference to this ftp site in the text of the book (indicated by Chapter and page number). These are termed 'Cited Notes' and are provided in a separate folder. An accompanying overview of these Cited Notes is provided in the same folder in the file 'SMS-CitedNotes-OVERVIEW'.
- 3) Extra sections and information (relevant extensions of the above Cited Notes and related material) arranged by Chapter and page numbers. An accompanying overview of this additional material is provided in the same folder in the file 'SMS-Extras-OVERVIEW'.
